Ai & algorithm

English :

Charles.river.media.ai.application.programming
Crc press - fuzzy logic - 1999 - practical applications of computational intelligence for adaptiv
Inorder & preorder & postorder
Introduction to the design and analysis of algorithms
Knowledge-based-intelligent-techniques-in-character-recognition
Xor-based hash functions
Wrox.beginning.algorithms.nov.2005.ebook-ling
Wiley-interscience - model-based signal processing - 2006
Wiley.interscience.jpeg2000.standard.for.image.compression.concepts.algorithms.and.vlsi.architect
Wiley.interscience.introduction.to.digital.signal.processing.and.filter.design.oct.2005.ebook-ling
Wiley.interscience.introduction.to.digital.signal.processing.and.filter.design.oct.2005.ebook-lin
Wideband printed monopole design using a genetic algorithm
When hashes collide [applied cryptography]
Weighted feature extraction using a genetic algorithm for intrusion detection
Vulnerability analysis of ais-based intrusion detection systems via genetic and particle swarm re
Volterra-system identification using adaptive real-coded genetic algorithm
Using the bch construction to generate robust linear hash functions
Using genetic algorithms to estimate confidence intervals for missing spatial data
Transmission of fuzzy recognition
Towards ant colony optimization of neuro-fuzzy interval rules
The teaching company (ttc) - david zarefsky - argumentation, the study of effective reasoning - g
The nist cryptographic workshop on hash functions
The evolutionary mechanisms in computer immune system
The algorithm design manual - springer-verlag (1997)
Study of one-way hash function to digital signature technology
Springer.evolutionary.computation.for.modeling.and.optimization.dec.2005
Springer,.machine.learning.in.computer.vision.(2005).ddu.lotb
Springer - simulating continuous fuzzy systems - 2006 - (isbn 3540284559)(buckley j., et al)(197s
Springer - introduction to fuzzy logic using matlab (springer 2006)
Spatio-temporal transform based video hashing
Software engineering - algorithms - addison wesley (ebook-pdf)
Signing a digital signature without using one-way hash functions and message redundancy schemes
Security of feature extraction in image hashing
Security for authenticated key exchange based on non-malleability
Secure evolutionary hardware for public-key cryptosystems
School trip attraction modeling using neural & fuzzy-neural approaches
Russell s., norvig p. Artificial intelligence- a modern appr
Robust t-s fuzzy model-based for chaotic cryptosystem
Robust regression based training of anfis
Robust image authentication using hash function
Robust and secure image hashing
Research on optimization of fuzzy membership function based on ant colony algorithm
Research of intrusion detection based on immunogenetic technique

Real-time route planning of the public transportation system
Quadratic approximation-based coordinate change in genetic algorithms
Protecting content distribution networks from denial of service attacks
Prognostic information fusion for constant load systems
Processing xpath queries in pc-clusters using xml data partitioning
Proceedings. 2003 ieee international conference on robotics, intelligent systems and signal processing
Prentice hall - analysis and applications of artificial neural networks
Power optimization for universal hash function data path using divide-and-concatenate technique
Pareto-optimal hardware for substitution boxes
Optimum configuration for renewable generating systems in residence using genetic algorithm
Optimization of membership functions in anomaly detection based on fuzzy data mining
Optimal zoning design by genetic algorithms
Optimal design of fuzzy controller based on ant colony algorithms
On the design of diploid genetic algorithms for problem optimization in dynamic environments
On the design of a document protection scheme based on steganography and secret sharing
On extractors, error-correction and hiding all partial information
Novel steganography detection using an artificial immune system approach
Nonlinear least square regression by adaptive domain method with multiple genetic algorithms
Ng the identifying code problem by a genetic algorithm
New genetic algorithm for the fixed charge transportation problem
Neurogenetic design centering
Neuro-fuzzy projection pursuit regression
Multi-objective evolutionary hardware for rsa-based cryptosystems
Multicollision attacks on some generalized sequential hash functions
Modified genetic algorithm based feature subset selection in intrusion detection system
Mit press - genetic programming
Maximizing the hash function of authentication codes
Maximal lifetime scheduling in sensor surveillance networks
Matrix based asymmetric bulk encryption algorithm
Lyapunov-based genetic algorithm controlled linear piezoelectric ceramic motor drive
Levenberg-marquardt method for anfis learning
Knowledge representation reasoning and declarative problem solving with answer sets
K-means algorithm based on particle swarm optimization algorithm for anomaly intrusion detection
Jbp,.artificial.intelligence.illuminated.(2004).[0763732303]
Jang j.-s.r., sun c.-t., mizutani e. Neuro-fuzzy and soft computing.. A computational approach to learning and machine
Irm.press.advances.in.image.and.video.segmentation.may.2006.ebook-ddu
Ip address lookup using a dynamic hash function
Intrusion detection method research based on optimized self-buildup clustering neural network
Intrusion detection based on clustering genetic algorithm
Introduction to the design and analysis of algorithms
Intelligent support systems technology_ knowledge management (2002)
Input selection for anfis learning
Image content-based geometric transformation resistant watermarking approach
Idea,.advances.in.fuzzy.object-oriented.databases.(2005).[1591403847]
Idea group - neural networks in healthcare - potential and challenges - 2006
Idea group - artificial neural networks in real-life applications - 2006
Hybrid learning neuro-fuzzy approach for complex modeling using asymmetric fuzzy sets
Human and machine recognition of faces-a survey
High-speed hardware architectures of the whirlpool hash function
Hiding data in images by optimal moderately-significant-bit replacement
Heuristic cryptanalysis of classical and modern ciphers
Hash-based proximity clustering for load balancing in heterogeneous dht networks
Hash function based on chaotic tent maps
Hash function based on chaotic neural networks
Handbook_of_evolutionary_computation
Gop-based channel rate allocation using genetic algorithm for scalable video streaming over error
Genetic algorithm to improve svm based network intrusion detection system
Genetic algorithm based methodology for breaking the steganalytic systems
Genetic algorithm based 3d face reconstruction
Fuzzy systems engineering - theory and practice (springer, 2005) ww
Fuzzy synchronization of chaos using gray prediction for secure communications
Fuzzy sets and fuzzy logic-klir yuan
Fuzzy modeling with spatial information for- geographic problems - f. Petry, et al., (springer, 2005) ww
Fuzzy group theory - j. Mordeson, et al., (springer, 2005) ww
Fuzzy databases - modeling design and implementation [idea, 2006]
Fuzzy control systems.crc press.1993
Fuzzy binary sequences for secure spread-spectrum systems
Formulation of an encryption algorithm on the basis of molecular genetics and image patterns
Fast nesting of 2-d sheet parts with arbitrary shapes using a greedy method and semi-discrete rep
Face recognition- a convolutional neural network approach
Face recognition (literature survey)
Extended kalman filter neurocontrol for neonate incubator
Evolving training model method for one-class svm

Evolving support vector machine parameters
Evolutionary computation vol 2, advanced algorithms and operators
Enhanced perceptual distance functions and indexing for image replica recognition
Energy scalable universal hashing
Elsevier, .advances.in.engineering.software.,28.(1997).ocr.7.0-2.5.lotb
Efficient smoothing of piecewise linear paths with minimal deviation
Efficient small-sized implementation of the keyed-hash message authentication code
Efficient secret sharing with access structures in a hierarchy
Efficient one-time proxy signatures
Dynamic key generations for secret sharing in access structures
Document clustering using particle swarm optimization
Detecting new forms of network intrusion using genetic programming
Delta compression with fixed-length substring coding for fast content download
Deep packet inspection using parallel bloom filters
Data mining with an ant colony optimization algorithm
Data clustering using particle swarm optimization
Crypto 2004
Cryptanalysis of simplified data encryption standard via optimization heuristics
Cryptanalysis of chang et al.'s signature scheme with message recovery
Crc press - handbook of computer vision algorithms in image algebra, 2nd ed - 2001 - (by laxxuss)
Crc press - computer-aided design engineering and manufacturing systems techniques and applicatio
Crc - handbook of neural network dsp
Computer science - algorithms - design and analysis of algorithms (1996 khuller)
Computational intelligence in reliability engineering new metaheuristics, neural and fuzzy techni
Computational intelligence in reliability engineering new metaheuristics neural and fuzzy techniq
Complete expression trees for evolving fuzzy classifier systems with genetic algorithms and appli
Comparing local search with respect to genetic evolution to detect intrusions in computer network
Combining greedy method and genetic algorithm to identify transcription factor binding sites
Combination artificial ant clustering and k-pso clustering approach to network security model
Collaborative channel affectation vs greedy method
Chaos-genetic algorithm for multiobjective optimization
Cafe - collaborative agents for filtering e-mails
Business applications and computational intelligence (2006)
Bioinformatics on a heterogeneous java distributed system
Binary sequences with good spectral properties obtained by genetic algorithms
Beginning.algorithms
Authenticated diffie-hellman key agreement protocol using a single cryptographic assumption
Artificial life evolution of security vulnerability agents
Artificial immune theory based network intrusion detection system and the algorithms design
Argumentation, study of effective reasoning (zarefsky) teaching company (ttc) guidebook 2
Applied fuzzy arithmetic - an introduction with engineering applications - m. Hanss (springer, 20
Ant colony optimization for best path planning
Ant algorithms for discrete optimization
Anomaly intrusion detection using multi-objective genetic fuzzy system and agent-based evolutiona
Anomaly detection based on unsupervised niche clustering with application to network intrusion de
An unsupervised particle swarm optimization classifier for sar image
An induction learning approach for building intrusion detection models using genetic algorithms
An improved algorithm for fuzzy data mining for intrusion detection
An immunity-based technique to characterize intrusions in computer networks
An immune genetic model in rule-based state action ids
An evolutionary fuzzy modeling approach for anfis architecture
An enhanced remote login authentication with smart card
An efficient network intrusion detection method based on information theory and genetic algorithm
An efficient key predistribution scheme for ad hoc network security
An application of decision support to network intrusion detection
An adaptive constant time hashing scheme for dynamic key set
Algoritms
Adaptive neuro-fuzzy inference system for modelling and control
Adaptive intrusion detection algorithm based on learning algorithm
Adaptive fuzzy prediction of low-cost inertial-based positioning errors
Academic press - neural networks in finance (2006)
Academic press - intelligent communication systems (2002)
Academic press - fuzzy logic, a practical approach by f martin mcneill and ellen thro - 1994
Academic frontiers of evolutionary computation (2004)
A symmetric cryptography based on extended cellular automata
A software implementation of a genetic algorithm based approach to network intrusion detection
A smart-card-based remote authentication scheme
A self-adaptive genetic algorithm for tasks scheduling in multiprocessor system
A saw-tooth genetic algorithm combining the effects of variable population size and reinitializat
A proposal of short proxy signature using pairing
A pixel block fuzzy similarity measure applied in two applications
A parallel genetic algorithm for the optimal design of multi-body model vehicle suspensions
A novel training algorithm in anfis structure

A novel framework for network intrusion detection based on clonal selection clustering algorithm
A novel framework for network intrusion detection using learning techniques
A novel congruent organizational design methodology using group technology and a nested genetic a
A novel approach to intrusion detection based on support vector data description
A new query reweighting method for document retrieval based on genetic algorithms
A new digital signature scheme without one-way hash functions and message redundancy
A multiple objective optimization based echo state network tree and application to intrusion dete
A machine learning framework for network anomaly detection using svm and ga
A low power lookup technique for multi-hashing network applications
A genetic algorithm for the design space exploration of datapaths during high-level synthesis
A framework of greedy methods for constructing interaction test suites
A fragile watermarking scheme for medical image
A convergence proof for ant colony algorithm
A comparative study of techniques for intrusion detection
A comparative study of learning methods in tuning parameters of fuzzy membership functions
A collaborative and multi-agent system for e-mail filtering and classification
A collaborative and multi-agent approach to e-mail filtering
[baeck, t, fogel, db, michalewicz, z] evolutionary computation vol 1 basic algorithms and operato
[b] lopez b.&co(eds) artificial intelligence research and development [faia-131] (ios,2005)(t)(45
[b] 501 challenging logic & reasoning problems (2ed,learningexpress,2005)(t)(161s)
Nonself space approach to network anomaly detection
A framework of greedy methods for constructing interaction test suites
Method of evolutionary neural network-based intrusion detection
Load balancing with multiple hash functions in peer-to-peer networks
Energy efficient data retrieval and caching in mobile peer-to-peer networks
Efficient architecture and hardware implementation of the whirlpool hash function

Data security

English :

Aes (advanced encryption standard)
Crc press - handbook of applied cryptography (algorithms, mathematics, science, source code)
Cryptanalysis
Fips
Hash algorithm
Key exchange
Other encryption method
Pgp
Pki
Rsa
Ssl
Xml based security for e-commerce applications
Wiley, hiding in plain sight steganography and the art of covert communication
Watermarking jbig2 text region for image authentication
Utilization of multiple block cipher hashing in authentication and digital signatures
Unconditionally secure signatures and its related schemes
Threshold signcryption scheme based on elliptic curve cryptosystem and verifiable secret sharing
Three-dimensional imaging and processing using computational holographic imaging
Theoretical analysis of a correlation attack based on convolutional codes
Theorem proving for modeling and conflict checking of authorization policies
Steganalysis of embedding in two least-significant bits
Statistical restoration for robust and secure steganography
Stallings, william - cryptography and network security 4th ed - prentice hall - (2005)
Soft computing approach to steganalysis of lsb embedding in digital images
Signature-based approach to fair document exchange
Short mceliece-based digital signatures
Security technology
Security of chien's efficient time-bound hierarchical key assignment scheme
Security of ad hoc networks and threshold cryptography
Security for industrial communication systems
Security architecture for web-based health insurance systems
Security and robustness enhancement for image data hiding
Secure third party distribution of xml data
Secure sockets layer
Secure key exchange over 1.9 km free-space range using quantum cryptography
Secure internet access to gateway using secure socket layer
Secure information by using digital data embedding and spread spectrum techniques
Secure e-voting with blind signature
Secure electronic data interchange over the internet
Secure advanced video coding based on selective encryption algorithms
Secret sharing schemes from three classes of linear codes
Schneier - applied cryptography 2ed - wiley
Rsa encryption algorithm based on torus automorphisms
Robust turbo-based data hiding for image and video sources
Robust data-hiding in audio
Robust data hiding for images
Revisiting public-key cryptography for wireless sensor networks
Reversible data-embedding with a hierarchical structure
Reversible data hiding
Reversible data hiding based on wavelet spread spectrum
Reversible data embedding into images using wavelet techniques and sorting
Randomness in cryptography
Quantization-based image steganography without data hiding position memorization
Public-key encryption based on chebyshev maps
Public-key cryptography using paraunitary matrices
Public key encryption and digital signatures based on permutation polynomials
Public key cryptography with matrices
Private key and public key quantum cryptography
Privacy-enhanced internet storage
Pki and digital certification infrastructure
Performance analysis of a medical record exchanges model
Partial identification of lorenz system and its application to key space reduction of chaotic cry
Optimized feature extraction for learning-based image steganalysis
Optimal signature design for spread-spectrum steganography
On the security of joint signature and hybrid encryption

On the security of a digital signature with message recovery using self-certified public key
On the power of quantum memory
On the optimum constructions of composite field for the aes algorithm
On the hardware design of an elliptic curve cryptosystem
On fundamental limitations of proving data theft
Next generation techniques for robust and imperceptible audio data hiding
News briefs
New concepts in evolutionary search for boolean functions in cryptology
Mit press - privacy on the line. The politics of wiretapping and encryption
Lossless generalized-lsb data embedding
Lossless data hiding in lzw compression
Lossless data hiding based on integer wavelet transform
Kluwer - fundamentals of cryptology, a professional reference and interactive tutorial
Joint security and robustness enhancement for quantization based data embedding
John wiley & sons - teamlib - cryptography for dummies
Is image steganography natural
Invariant bilinear forms and its application in information security
Internet x.509 public key infrastructure proxy certificate profile
Integrated approach for fault tolerance and digital signature in rsa
Inserted chaotic-sequence cryptography and supported software's investigation
Information_hiding_techniques_for_steganography_and_digital_watermarking
Increasing user privacy in online transactions with x.509 v3 certificate private extensions and s
Improving the security of a dynamic look-up table based chaotic cryptosystem
Implementation of distributed key generation algorithms using secure sockets
Image data embedding system for watermarking using fresnel transform
Idea group - multimedia security - steganography and digital watermarking techniques for protecti
Id-based ring authenticated encryption
Hybrid key establishment for multiphase self-organized sensor networks
High capacity data embedding in the wavelet domain
Hiding information in images
Hiding data in multitone images for data communications
Halftone visual cryptography
Grid colorings in steganography
Fuzzy modular arithmetic for cryptographic schemes with applications for mobile security
Free-space quantum cryptography and satellite key uploading
Formatted text document data hiding robust to printing, copying and scanning
Farsi_template
Extended rsa cryptosystem and digital signature schemes in the domain of gaussian integers
Encyclopedia of cryptology
Elsevier press - 0120471442 - data hiding fundamentals and applications content security in digit
Elliptic curve cryptography engineering
Efficient authenticated encryption schemes with public verifiability
Effective image retrieval based on hidden concept discovery in image database
E-book - lock pick - cryptology and physical security
Dsa-based verifiable and recoverable encryption of signatures and its application in certified e-
Dsa
Document image secret sharing using bit-level processing
Document image data hiding technique using character spacing width sequence coding
Divider architecture for cryptography systems
Digital signatures
Developing a cryptology algorithm by using wavelet transform
Design and implementation of smartcard-based secure e-mail communication
Des
Defeating_encryption
Decoding codes with the identifiable parent property
Deciding knowledge in security protocols under (many more) equational theories
Data-hiding in audio using frequency-selective phase alteration
Data security-cryptography=privacy
Data hiding system by fresnel transform
Data hiding of binary images using pair-wise logical computation mechanism
Data hiding in video
Data hiding in the bit stream domain for mpeg-2 coded video sequences exploiting space and freque
Data hiding in images with adaptive numbers of least significant bits based on the human visual s
Data hiding in image and video .i. Fundamental issues and solutions
Data hiding in curves with application to fingerprinting maps
Data hiding in binary image for authentication and annotation
Data embedding in text for a copier system
Data embedding in audio using time-scale modification
Customizable elliptic curve cryptosystems
Cryptology for digital tv broadcasting
Cryptology and physical security - rights amplification in master-keyed mechanical locks
Cryptography in the quantum world
Cryptographic applications of brahmagupta-bha-spl tilde-skara equation

Cryptic primes
 Configuring enterprise public key infrastructures to permit integrated deployment of signature, e
 Component-based security model for xml messaging services
 Communications cryptography
 Cheating prevention in visual cryptography
 Certified e-mail delivery with dsa receipts
 Capacity estimates for data hiding in compressed images
 Cambridge, complexity and cryptography an introduction (2006) ddu
 Bounded gaussian fingerprints and the gradient collusion attack [multimedia fingerprinting applic
 Audio data hiding with application to surround sound
 Aspects of authentication and cryptology
 Applied cryptology.cryptographic protocols.computer security models
 An introduction to contemporary cryptology
 An introduction to block cipher cryptanalysis
 An image watermarking technique using cellular automata transform
 An examination of a web-based advanced encryption standard system
 An embedding multiplex signatures in binary images by using pattern dither method
 An efficient threshold group signature scheme
 An efficient message digest algorithm (md) for data security
 An area-efficient universal cryptography processor for smart cards
 An architecture for end-to-end and inter-domain trusted mail delivery service
 An adaptive constant time hashing scheme for dynamic key set
 Agent based multiple level dynamic multimedia security system
 Advances.in.cryptology.crypto.2004(2005)
 A watermarking method based on fractal self-similarity
 A transcoding robust data hiding method for image communication applications
 A survey on mix networks and their secure applications
 A study on detecting image hiding by feature analysis
 A study of the elliptic curve cryptology applies to the next generation protocol
 A steganographic method for hiding data in vq encoded images
 A source and channel-coding framework for vector-based data hiding in video
 A secure mechanism for network authentication combining hand shapes verification and encryption
 A secure and fair dsa-based signature exchange protocol
 A scalable encryption method allowing backward compatibility with jpeg2000 images
 A public-key cryptographic processor for rsa and ecc
 A protocol for designated confirmer signatures based on rsa cryptographic algorithms
 A proposal of architectural elements for implementing secure software download service in softwar
 A primer on cryptography in communications
 A practical multipurpose color image watermarking algorithm for copyright protection and image au
 A novel unified architecture for public-key cryptography
 A novel high-capacity data-embedding system
 A novel compression and encryption scheme using variable model arithmetic coding and coupled chao
 A novel approach for increasing security and data embedding capacity in images for data hiding ap
 A new steganographic method for data hiding in microsoft word documents by a change tracking tech
 A new cembs based on rsa signatures and its application in constructing fair exchange protocol
 A minimum distortion data hiding technique for compressed images
 A method of safety communication for mobile agent
 A jca-based implementation framework for threshold cryptography
 A general secure electronic auction protocol
 A framework for secure download for software-defined radio
 A framework for describing block cipher cryptanalysis
 A distributed multipurpose mail guard
 A data embedding scheme for h.263 compatible video coding
 A comprehensive framework for enhancing security in infiniband architecture
 A comment on cryptographic applications of brahmagupta-bhaskara equation
 Privacy in mobile agents

Image procesing

English :

A novel compression technique for super resolution color photography
Image compression with structure-aware inpainting
Low-rate and flexible image coding with redundant representations
(ebook) john wiley & sons - video codec design 2002
[crc press] computer visualization - graphics techniques for engineering and scientific analysis
Wiley.interscience.2-d.and.3-d.image.registration.for.medical.remote.sensing.and.industrial.ap
A co-evolutionary competitive multi-expert approach to image compression with neural networks
A comparison of principal component analysis and generalized hebbian algorithm for image compress
A flexible hardware jpeg 2000 decoder for digital cinema
A high-performance architecture for embedded block coding in jpeg 2000
A mesh-based disparity representation method for view interpolation and stereo image compression
A modified spiht algorithm for image coding with a joint mse and classification distortion measur
A new approach for sa-based fractal image compression
A new graphic cryptosystem based on one-dimensional memory cellular automata
A new image encryption algorithm based on chaos system
A new image encryption algorithm based on inversable functions defined on galois fields
A novel approach of reordering color palette for indexed image compression
A novel block cipher based on hierarchy of one-dimensional composition chaotic maps
A novel image encryption scheme based-on jpeg encoding
A novel interactive progressive decoding method for fractal image compression
A novel lossless image compression algorithm using arithmetic modulo operation
A novel method of lossy image compression for digital image sensors with bayer color filter array
A parallel image compression system for high-speed cameras
A practical course in digital video communications based on matlab
A quad-tree decomposition approach to cartoon image compression
A range-domain approximation error-based approach for fractal image compression
A secret sharing scheme for image encryption
A self-adaptive image encryption algorithm based on composite discrete chaotic system
A simplified mpc for image compression
A symmetric image encryption approach based on line maps
A two-pass improved encoding scheme for fractal image compression

Academic press - handbook of image and video processing - 2000 - (by laxxuss)
Adaptive downsampling to improve image compression at low bit rates
Adaptive prediction trees for image compression
Adaptive-quantization digital image sensor for low-power image compression
An asymmetric image encryption based on matrix transformation
An enhanced chaos based image encryption algorithm
An experience in image compression using neural networks
An image encryption algorithm based on mixed chaotic dynamic systems and external keys
An image encryption approach based on a new two-dimensional map
An image encryption scheme based on chaotic systems
Application of data encryption standard to bitmap and jpeg images
Architecture design and vlsi hardware implementation of image encryption-decryption system using
Architecture design of the re-configurable 2-d von neumann cellular automata for image encryption
Bayes.bayesian approach to image interpretation (kluwer, 2002)(kopparapu, desai)(144s)
Binary image encoding using 1d chaotic maps
Binary image transformation using two-dimensional chaotic maps
Block tree partitioning for wavelet based color image compression
Color image compression using mutual spectral information
Colour image secret sharing
Comparison criteria for optimum image compression
Complementary image compression based on the theory of fuzzy information granulation
Compound image compression for real-time computer screen image transmission
Compression of colour images by inter-band compensated prediction
Concurrency techniques for arithmetic coding in jpeg2000
Crc press - image recognition and classification (2006)
Crc press understanding surveillance technologies spy devices, their origins & applications
Decryption system using 2-d cellular automata
Dekker - biosignal and biomedical image processing - matlab based applications - 2004 - (by laxxu
Design and graphics - crc press - digital color imaging handbook
Design and graphics - digital image processing
Detecting computer-induced errors in remote-sensing jpeg compression algorithms
Distributed source coding theorem based region of interest image compression method
Document image secret sharing using bit-level processing
Effect of image compression on iris recognition
Effective palette indexing for image compression using self-organization of kohonen feature map
Efficient encryption of compressed color images
Efficient rate control for jpeg-2000
Enhanced chaotic image encryption algorithm based on baker's map
Expert knowledge based automatic regions-of-interest (roi) selection in scanned documents for dig
Extensible jpeg2000 image compression systems
Fractal color image compression on a pseudo spiral architecture
Fractal image compression on spiral architecture
Goutsias, vincent, bloomberg (eds) mathematical morphology and its applications to image and sign
High-dynamic-range still-image encoding in jpeg 2000
High-quality dct-based image compression using partition schemes
Hyperspectral image compression using jpeg2000 and principal component analysis
Image compression based on btc-dpcm and its data-driven parallel implementation
Image confidentiality using progressive jpeg
Image encrypted system using scan patterns and 2-d cellular automata
Image encryption algorithm based on chaotic sequence
Image encryption and decryption by means of an optical phase mask
Image encryption and decryption using scan methodology
Image encryption based on a novel reality-preserving
Image encryption using infinite series convergence
Image encryption using progressive cellular automata substitution and scan
Image.processing.in.c
Improved baker map for image encryption
Improvement of dct-based compression algorithms using poisson's equation
Improving an encryption scheme adapted to jpeg stream encoding
John wiley & sons - digital image processing - piks inside - 3rd edition - 2001
Lossless image compression with bctw
Matrix factorizations for parallel integer transformation
Motion vector encryption in multimedia streaming
Multiscale recurrent patterns applied to stereo image coding
Nonlinear image representation for efficient perceptual coding
On multirate optimality of jpeg2000 code stream
On the security of an image encryption method
On the use of context-weighting in lossless bilevel image compression
On the use of standards for microarray lossless image compression
Optical image encryption based on dyadic phase permutation in fourier domain
Oriented wavelet transform for image compression and denoising
Perceptual adaptive insensitivity for support vector machine image coding
Performance evaluation of functional medical imaging compression via optimal sampling schedule de

Petrou m., bosdogianni p. Image processing.. The fundamentals (wiley, 1999)(t)(355s)
Prentice hall - image processing with labview and imaq vision
Progressive scalable interactive region-of-interest image coding using vector quantization
Randy crane - a simplified approach to image processing, classical and modern techniques in c - 1
Recovering dc coefficients in block-based dct
Region-of-interest image coding based on ebcot
Rf microwave system analysis for wideband radar & remote sensing-yan zhang
Robotics dekker - understanding and applying machine vision, 2nd ed - 2000 - (by laxxuss)
Robotics_handbook_of_computer_vision_algorithms_in_image_algebra
Secure display system by use of encrypted digital holograms
Secure image communication using blind source separation
Selective encryption of human skin in jpeg images
Shared key encryption of jpeg color images
Single-sensor camera image compression
Skeleton based image encryption
Spatial-polarization state scrambling for image encryption obtained with subwavelength gratings
Stein a., et al. (eds) spatial statistics for remote sensing (kluwer 2002)(400dpi)(t)(301s)_mvsa_
Strengths and weaknesses of optical encryption algorithms
The application of chaotic maps in image encryption
The cryptanalyses of the discretized baker map and an enhanced arithmetic
The general formula and algorithm of the discretized baker map
Three-dimensional imaging and processing using computational holographic imaging
Three-dimensional medical imaging algorithms-p421-stytz
